

indigo*iota*

the project brain for consultancies

This document defines the visual identity of indigo iota — the wordmark, color, typography, and component usage that every surface of the product, the website, and our outbound should be measured against.

indigo*iota*

Albert Sans · ExtraBold ·
Instrument Serif · Italic
Color: #3812F3

Construction

"indigo"	Albert Sans · ExtraBold · tight tracking (−0.03em).
"iota"	Instrument Serif · Italic · 400 · placed to the right with a small gap (~0.04em).
Color	Indigo #3812F3 by default. Black #0F0F0F is the only other approved foreground.
Casing	Always lowercase. "INDIGO IOTA" or "Indigo Iota" are incorrect.
Min size	16px / 5mm equivalent — below this the iota italic loses crispness.

Approved color treatments

indigo*iota*

Indigo on cream — default

indigo*iota*

Cream on indigo — inverted / hero

indigo*iota*

White on black — last resort

COLOR

Two-color system

Almost every surface in the product is built from two colors: cream as the canvas and indigo as the single accent. Black is the only foreground we add. Everything else (greys, borders) is a tint of these.

Used sparingly — for status badges, alerts, and validation. Never decorative.

TYPOGRAPHY

Typography

Three families. Albert Sans does all the UI work. Instrument Serif is reserved for the iota italic in the wordmark. JetBrains Mono is for technical chrome.

Albert Sans

System & body

Aa Bb Cc 123 ?!

Regular 400	The project brain for consultancies.
Medium 500	The project brain for consultancies.
Bold 700	The project brain for consultancies.
ExtraBold 800	The project brain for consultancies.

Use for All UI text — body, headings, labels, buttons, navigation.

Instrument Serif

Display italic

Aa Bb Cc 123 ?!

Italic 400	<i>iota — the brain that keeps your team in sync.</i>
------------	---

Use for The 'iota' part of the wordmark only. Reserved for brand expression — never body copy.

JetBrains Mono

Technical accent

Aa Bb Cc 123 ?!

Regular 400	WEEK 12 / 12	•	487 emails	•	142 files
-------------	--------------	---	------------	---	-----------

Use for Counters, IDs, mono-aligned data, technical chrome.

TYPE SCALE

Scale

Eight steps cover every type need. Pair sizes with the weights below — never bold a Body to fake a Heading.

Display · 48px

Stay in sync

Heading 1 · 32px

Stay in sync

Heading 2 · 24px

The brain that syncs

Heading 3 · 18px

Muted copy

#616161 neutral grey

COMPONENTS

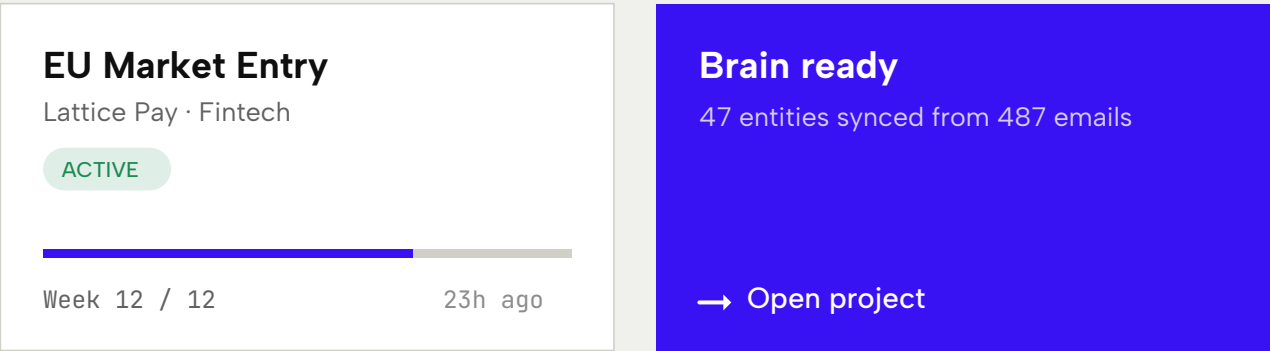

Components

Buttons

Primary uses an indigo to indigo-soft gradient. Secondary is bordered white. Use one primary per screen.

Cards

White cards are the workhorse. Indigo fills reserved for hero / moments of emphasis — never a sea of them.

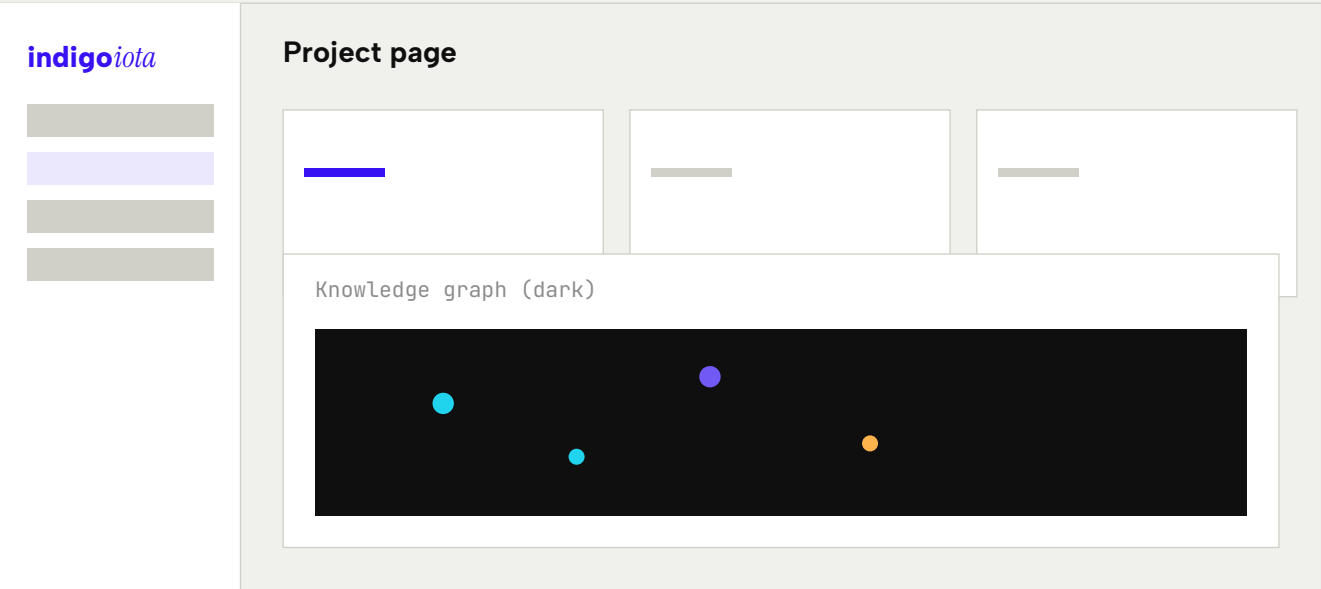

Badges

Layout & spacing

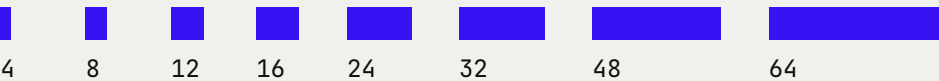

Generous whitespace, clear hierarchy. The app uses an 8px base grid — every spacing value is a multiple of 4 (4, 8, 12, 16, 24, 32, 48, 64).

Page shell

Sidebar is white on cream. Cards are white. The knowledge graph keeps its dark canvas for visual drama.

Spacing scale

DO'S & DON'TS

DO

- ✓ **Keep the wordmark lowercase**
indigo iota. Never Indigolota or INDIGO IOTA.
- ✓ **Use indigo for one thing at a time**
A page should have one primary CTA, not five.
- ✓ **Lean on cream backgrounds**
Most surfaces are cream or white. Indigo is the spice.
- ✓ **Reserve serif italic for 'iota'**
Instrument Serif is for the brand mark only.
- ✓ **Use JetBrains Mono for technical chrome**
Counters, IDs, week numbers, hashes.
- ✓ **Keep the knowledge graph on dark**
The graph keeps its dark canvas for visual drama.

DON'T

- ✗ **Don't redraw the iota italic in another font**
It must be Instrument Serif, italic 400.
- ✗ **Don't tint the wordmark**
Indigo, black, or cream only. No greys, no other hues.
- ✗ **Don't use indigo as body text**
Body is black. Indigo is for links, CTAs, and brand chrome.
- ✗ **Don't mix the old teal accent in**
We've moved off teal. Indigo is the sole accent.
- ✗ **Don't add a separate icon to the logo**
The wordmark IS the logo. No symbol next to it.
- ✗ **Don't put the wordmark on photography**
Use a flat cream or indigo background.
